Claude Prompt Library

Expert AI output for every QA task — no AI experience needed.

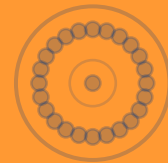

✓ No AI experience needed

 3 simple steps

 33 templates · 12 categories

What is Claude? (Plain English)

Claude is an AI assistant by Anthropic — like a brilliant expert colleague available 24/7, who gives professional-quality answers in seconds.

Like A consultant...

Before: Wait weeks for a report

With Claude: Get it in 2 minutes

Like A senior developer...

Before: Wait for code review

With Claude: Instant expert feedback

Like A documentation writer...

Before: Spend hours writing reports

With Claude: Done in under 5 minutes

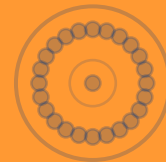

Like A QA expert...

Before: Manually write all test cases

With Claude: Generated in seconds

What is a Prompt Template?

Think of it like a recipe

A recipe tells you exactly what ingredients to add and how to cook them.

A prompt template works the same way — it tells Claude exactly what information you have and what you want it to do.

You never write it from scratch. You just fill in the blanks with your own project details.

The result? Expert-quality AI output every time.

See the [BRACKETS] on the right? Those are your blanks — replace each one with your real project details. Takes 30 seconds.

A real example

STEP 1 Template already written for you ↓

Generate test cases for [FEATURE NAME] in
[APP] for [USER ROLE]

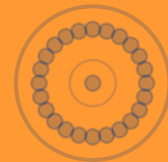

STEP 2 You replace the [BRACKETS] ↓

Generate test cases for **Login page** in **D365** for
Admin user

Paste into Claude → 20 test cases in seconds!

How to Use — Anyone Can Do This in 3 Steps

STEP 1

Open & find

Open the HTML library on your computer.

Search for your task or browse the 7 category tabs.

Each card tells you exactly what to fill in.

 10 seconds

STEP 2

Fill in the [BRACKETS]

Every template has [BRACKETS] in gold.

Replace each with your real details:

- [FEATURE NAME] → Login page
- [APP] → D365 or Salesforce
- [USER ROLE] → Admin user

 30 seconds

STEP 3

Paste into Claude & done!

Click 'Copy prompt' on the card.

Open claude.ai in any browser.

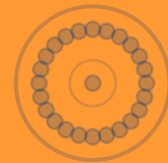

Paste and press Enter.

Expert output in seconds — ready to use!

 20 seconds

 Find (10s) + Fill [BRACKETS] (30s) + Paste (20s) = Under 60 seconds to expert-quality output

Real Example — Writing Test Cases (45 min → 2 min)

✗ WITHOUT the library

- Open a blank document
- Think about what to test (30 min)
- Write test cases manually
- Miss edge cases — go back and add more
- Format everything into a table (20 min)

⚠ **Total: 45–90 minutes**

⚠ **Quality: depends on your experience**

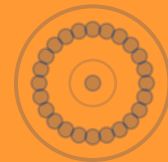

✓ WITH the library

- ✓ Open the HTML library (10s)
- ✓ Find 'Test Cases' template (10s)
- ✓ Fill in 3 fields — Feature, App, Role (30s)
- ✓ Click 'Copy prompt' (5s)
- ✓ Paste into Claude → press Enter (5s)

🚀 **Total: Under 2 minutes**

🚀 **Quality: Senior QA Engineer level**

Test Cases

Generate test cases for a feature

Beginner friendly ✓

WHAT YOU FILL IN:

- Feature name ← *fill in*
- App (D365 / Salesforce) ← *fill in*
- User role ← *fill in*

✓ WHAT CLAUDE GIVES YOU:

Numbered test cases with steps, expected result, and priority — ready for Jira or ADO.

💡 Works for any feature — D365, Salesforce, or custom web apps.

Playwright / TypeScript test script

Intermediate ⚡

WHAT YOU FILL IN:

- Feature or page name ← *fill in*
- App URL ← *fill in*
- Your manual test steps (paste in) ← *fill in*

✓ WHAT CLAUDE GIVES YOU:

A complete Playwright TypeScript file with Page Object Model, ADO tags, and error handling.

💡 Give it your manual steps — it writes the automation code for you.

Edge case test cases

Beginner friendly ✓

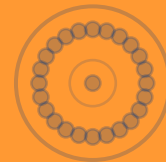

WHAT YOU FILL IN:

- Feature name ← *fill in*
- Input fields and data types ← *fill in*
- Known validation rules ← *fill in*

✓ WHAT CLAUDE GIVES YOU:

15–20 edge case tests covering boundaries, empty inputs, and unusual behaviour — table format.

💡 Run this before every release — catches bugs that normal testing misses.

D365 OData API test cases

Advanced 🔧

WHAT YOU FILL IN:

- D365 entity (e.g. SalesOrderHeaderV2)
 ← fill in
- Environment (DEV / UAT / PROD) ← fill in
- Operations (GET / POST / PATCH / DELETE) ← fill in

✅ WHAT CLAUDE GIVES YOU:

Complete API tests with sample URLs, payloads, and expected JSON — covering CRUD and error responses.

💡 Pre-fill entity name from your project documents (e.g. SalesOrderHeaderV2).

RSAT test recording review

Intermediate ⚡

WHAT YOU FILL IN:

- RSAT recording steps (paste in) ← fill in
- Business scenario being tested ← fill in

✅ WHAT CLAUDE GIVES YOU:

Findings table with gaps, missing assertions, flakiness risks, and fixes — all prioritised.

💡 Paste your RSAT XML — Claude reads and analyses the whole thing.

D365 KT document outline

Beginner friendly ✅

WHAT YOU FILL IN:

- D365 module name ← fill in
- Target audience ← fill in
- Scope of processes covered ← fill in

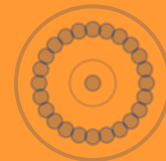

✅ WHAT CLAUDE GIVES YOU:

Full KT document with navigation paths, process flows, troubleshooting guide, and UAT checklist.

💡 Works for any D365 module — great for onboarding new team members.

Azure DevOps & Salesforce

Playwright pipeline debug

Advanced 🔧

WHAT YOU FILL IN:

- Your azure-pipelines.yml (paste in) ← *fill in*
- Error log from the failed run ← *fill in*
- Node, OS, and Playwright versions ← *fill in*

WHAT CLAUDE GIVES YOU:

Root cause explanation + fixed YAML you copy straight into your pipeline file.

💡 Paste the exact error log — the more detail, the better the fix.

ADO test plan setup

Beginner friendly ✅

WHAT YOU FILL IN:

- Project name (e.g. GlobalTech / RetailMax) ← *fill in*
- Sprint or release name ← *fill in*
- Features in scope ← *fill in*

WHAT CLAUDE GIVES YOU:

Full ADO test plan with suite hierarchy, config matrix, criteria, and sign-off checklist.

💡 Use at the start of every sprint — 2 minutes instead of 30.

Salesforce test cases

Intermediate ⚡

WHAT YOU FILL IN:

- Feature name (e.g. Lead conversion) ← *fill in*
- Cloud type (Sales / Service) ← *fill in*
- User profiles involved ← *fill in*

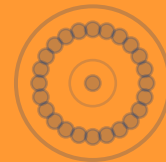

WHAT CLAUDE GIVES YOU:

Profile-specific test cases covering access, workflow rules, validation, and integration.

💡 Specify user profile — Claude writes profile-aware test cases automatically.

Defect Management

Write a detailed defect report

Beginner friendly

WHAT YOU FILL IN:

- What went wrong (one sentence) *← fill in*
- Steps to reproduce it *← fill in*
- What should have happened *← fill in*
- Browser, app version, environment *← fill in*

WHAT CLAUDE GIVES YOU:

Complete Jira/ADO defect report with severity, numbered steps, actual vs expected, and fix direction.

Anyone on the team can use this — no QA experience needed to write a great bug report.

Root cause analysis (5-Whys)

Intermediate

WHAT YOU FILL IN:

- Defect title and description *← fill in*
- Module affected *← fill in*
- Recent changes deployed before the bug *← fill in*

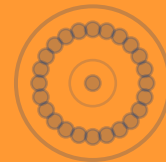

WHAT CLAUDE GIVES YOU:

Structured RCA: immediate cause, root cause, corrective actions, and new regression tests to add.

Great for sprint retrospectives — helps the whole team learn from every defect.

Power BI & Documentation

Power BI report test cases

Beginner friendly ☒

WHAT YOU FILL IN:

- Report name (e.g. Pick Slip Enquiry) *← fill in*
- Data source (D365 / Dataverse / SQL) *← fill in*
- Available filters and slicers *← fill in*

☒ WHAT CLAUDE GIVES YOU:

Test cases for data accuracy, filters, performance, export, and role security — ADO table format.

 Works for any Power BI report — fill in your report name and available slicers.

Test summary report

Beginner friendly ☒

WHAT YOU FILL IN:

- Project and sprint name *← fill in*
- Test counts (passed / failed / blocked) *← fill in*
- Open defect IDs and severities *← fill in*

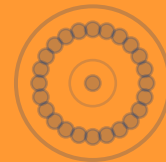

☒ WHAT CLAUDE GIVES YOU:

Professional test summary with exec summary, metrics, defect breakdown, and Go/No-Go recommendation.

 4 minutes instead of 90 — perfect for sprint end sign-offs with clients.

Web Application

Cross-browser & responsive

Beginner friendly

WHAT YOU FILL IN:

- Web app name and URL *← fill in*
- Browsers to test (Chrome, Edge, Firefox, Safari) *← fill in*
- Key pages to test *← fill in*

WHAT CLAUDE GIVES YOU:

Test cases for layout, functionality and visual consistency across all browsers and screen sizes.

Run before every release — catches bugs that only appear on specific browsers or devices.

Form validation test cases

Beginner friendly

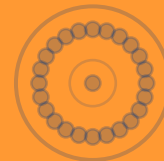

WHAT YOU FILL IN:

- Form name (e.g. Registration, Checkout) *← fill in*
- All fields in the form *← fill in*
- Mandatory fields and validation rules *← fill in*

WHAT CLAUDE GIVES YOU:

Complete form validation — mandatory checks, format, boundary values, error messages, submit behaviour.

Works for any web form — registration, login, checkout, contact or payment forms.

Insurance policy test cases

Beginner friendly

WHAT YOU FILL IN:

- Insurance type (Home / Health / Vehicle / Travel) *← fill in*
- Key features (sum insured, premium, riders) *← fill in*
- User roles (Customer, Agent, Admin) *← fill in*

WHAT CLAUDE GIVES YOU:

Test cases for policy creation, renewal, modification and cancellation — all roles and edge cases.

Works for Home, Health, Vehicle and Travel insurance — just specify the type.

Insurance claims test cases

Intermediate

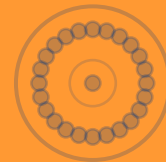

WHAT YOU FILL IN:

- Insurance type (Home / Health / Vehicle / Travel) *← fill in*
- Claims process steps in your application *← fill in*
- Claim approval workflow (Auto / Manual) *← fill in*

WHAT CLAUDE GIVES YOU:

End-to-end claims test cases — submission, document upload, approval/rejection, and payout.

Covers full claims lifecycle from submission to payout — critical for insurance projects.

Shopping flow test cases

Beginner friendly

WHAT YOU FILL IN:

- Platform type (Flipkart-style, Amazon-style, Meesho, custom) *← fill in*
- Product types sold *← fill in*
- Payment methods (UPI, Card, COD, Wallet, EMI) *← fill in*

WHAT CLAUDE GIVES YOU:

End-to-end shopping flow from product search to order confirmation — all payment methods covered.

Works for any e-commerce platform — specify marketplace, D2C or reseller for accurate scenarios.

Order management & returns

Beginner friendly

WHAT YOU FILL IN:

- Platform type (Flipkart-style, Amazon-style, custom) *← fill in*
- Return policy (e.g. 7-day, 30-day) *← fill in*
- Refund methods (original payment, wallet, bank) *← fill in*

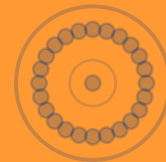

WHAT CLAUDE GIVES YOU:

Complete test cases for order tracking, cancellation, returns, exchanges and refunds.

Covers every post-order scenario — the most common customer pain points in Indian e-commerce.

Presentations

KT session slide outline

Intermediate ⚡

WHAT YOU FILL IN:

- Topic of the KT session (e.g. D365 Procurement) ← *fill in*
- Target audience (e.g. New QA engineers) ← *fill in*
- Duration of session and key areas to cover ← *fill in*

WHAT CLAUDE GIVES YOU:

Slide-by-slide presentation outline with titles, content points, speaker notes, and demo steps.

 Turn any KT session into a professional presentation in 5 minutes — consistent quality every time.

Test results presentation

Beginner friendly 

WHAT YOU FILL IN:

- Project and sprint name ← *fill in*
- Key metrics (passed / failed / blocked / total) ← *fill in*
- Release recommendation (Go / No-Go) ← *fill in*

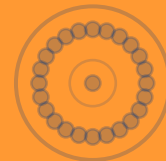

WHAT CLAUDE GIVES YOU:

Complete slide deck content for a sprint results presentation — exec summary, metrics, defects, recommendation.

 Turn your sprint results into a stakeholder-ready presentation in under 5 minutes.

AI Writing & Docs

Sprint retrospective notes

Beginner friendly ☒

WHAT YOU FILL IN:

- Sprint name and number *← fill in*
- What went well (bullet points) *← fill in*
- What did not go well and action items *← fill in*

☒ WHAT CLAUDE GIVES YOU:

Professional retrospective document with sections, action items table with owners and due dates.

 60 minutes of note-taking reduced to 5 minutes — consistent format every sprint.

Stakeholder defect email

Beginner friendly ☒

WHAT YOU FILL IN:

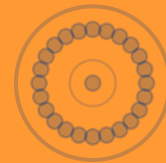

- Defect title and brief description *← fill in*
- Business or user impact *← fill in*
- Current workaround and expected fix timeline *← fill in*

☒ WHAT CLAUDE GIVES YOU:

Professional email to stakeholders explaining a defect in plain English — no technical jargon.

 Non-technical stakeholders need plain English — this gets the message across clearly.

Real Time Savings — Every Single Day

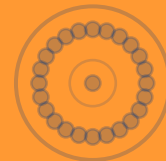

Task	Without template	With Claude template	Time saved
Write test cases for a feature	45–90 min	2 min	~88 min
Write a defect report	20–30 min	1 min	~29 min
Debug ADO pipeline failure	60–120 min	3 min	~117 min
Draft a test summary report	90–120 min	4 min	~116 min
Plan a Power BI test run	30–45 min	2 min	~43 min
Generate a Playwright test script	60–120 min	5 min	~115 min

Total saving across all 6 tasks = over 8 hours per engineer — every single week

Frequently Asked Questions

Q: Do I need to create a Claude account?

A: Yes — go to claude.ai and sign up free. Takes 2 minutes. The free plan is enough for all daily QA work.

Q: Can I change the templates?

A: Absolutely! Once you copy a prompt, edit it freely before pasting. Make it your own.

Q: What if Claude gives a wrong answer?

A: Follow up with: 'Make it more concise' or 'Fix the format'. Claude refines the answer instantly.

Q: Is my project data safe?

A: Don't paste sensitive passwords or client data. Describe the scenario in general terms — still works great.

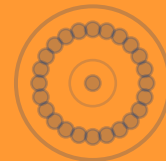

Q: Can I use this on my phone?

A: Yes! The HTML library and claude.ai both work on mobile. Open the HTML file in Chrome on your phone.

Q: Who do I contact to add new templates?

A: Reach out to Ramya — describe your task in plain English and she'll add a template within 24 hours.

Your Getting Started Checklist

01

Sign up for Claude

2 min

Go to claude.ai → Sign up free → Done in 2 minutes

02

Save the HTML library

1 min

Download the HTML file → Save to desktop → Open in any browser

03

Try your first prompt

2 min

Find 'Write test cases' → Fill in 3 fields → Copy → Paste into Claude

04

Use it on every task

Daily

Before writing anything manually — check the library first. 9 out of 10 tasks have a template.

05

Share what works

Ongoing

Found a template that saved time? Tell Ramya — she'll improve it for everyone.

06

Request new templates

As needed

Task not covered? Send Ramya a message — new templates added within 24 hours.

Key Takeaways

Remember these — that's all you need to get started today.

No AI experience needed — the templates do all the hard work

Expert output in under 60 seconds — faster than any manual approach

Just fill in the [BRACKETS] with your real project details

Not happy? Tell Claude 'try again' or 'be more concise' — it refines

Save the HTML file to your desktop — works fully offline

Share your experience — every improvement helps the whole team
